

In 2026, Medicare Part D prescription drug costs are capped at \$2100¹

WHAT THIS MEANS FOR YOU

When you get your **first VYNDAMAX[®] prescription** in 2026, you will reach the \$2100 out-of-pocket maximum.

For the rest of the year, you will pay

\$0

for **ALL** your prescription medications covered by Medicare Part D (including VYNDAMAX).

A Pfizer Patient Access Coordinator (PAC) is a dedicated resource, available to guide you with care and commitment

A Pfizer PAC can:

- Help you understand your insurance coverage, your expected out-of-pocket costs, and how to fill your VYNDAMAX prescription
- Help you understand the most appropriate financial support options

See next page for helpful information. ▼

Open enrollment for Medicare Part D is October 15 to December 7*

Open enrollment is when you can change your **Medicare drug plan**. If you switch plans, be sure to give your doctor a copy of your new prescription insurance card.

What you should know

- Most insurance plans will approve your medicine if your doctor requests special permission—called a **Prior Authorization** or **Medical Exception**—even if your plan says it's not covered
- If your current authorization has expired or if you're new to VYNDAMAX, your doctor will need to request insurance approval and send a prescription to a **Specialty Pharmacy**

What to do now

- You don't have to navigate this on your own
- Contact your **Pfizer Patient Access Coordinator (PAC)** to learn how to get your medicine, whether you're continuing VYNDAMAX in the new year or starting VYNDAMAX for the first time
